## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21 and 34-45, drawn to Processing Data Packets with an Adaptive Error Correction and Modulating Scheme Based on Channel Conditions wherein Pre-Processing of Data Packets Does Not Depend on Current Conditions, classified in class 714, subclass 774.
- II. Claims 22-33 and 46-53, drawn to A Method for Processing Data Packets into a Particular Data Structure for Transmission, classified in class 714, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Processing Data Packets with an Adaptive Error Correction and Modulating Scheme Based on Channel Conditions wherein Pre-Processing of Data Packets Does Not Depend on Current Conditions, and Group II, A Method for Processing Data Packets into a Particular Data Structure for Transmission, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I, Processing Data Packets with an Adaptive Error Correction and Modulating Scheme Based on Channel Conditions wherein Pre-Processing of Data Packets Does Not Depend on Current Conditions, has separate utility such as in communication systems using data structures different from the data

structure taught in Group II. In the instant case, invention Group II, A Method for Processing Data Packets into a Particular Data Structure for Transmission, has separate utility such as in a transmission media requiring the particular data structure of Group II, which depends on current channel conditions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to John Lastova on 16 February 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Torres whose telephone number is (703) 308-7066. The examiner can normally be reached on M-F 8-5.
